It presents geological, geophysical, geochemical and petrological aspects as well as studies on physical geography.

Piton de la Fournaise - Wikipedia Piton de la Fournaise (French for "Peak of the Furnace") is a shield volcano on the eastern side of Réunion island (a French department) in the Indian Ocean. It is currently one of the most active volcanoes in the world, along with Kālauea in the Hawaiian Islands, Stromboli and Etna in Italy and Mount Erebus in Antarctica. A previous eruption began in August 2006 and ended in January 2007.
