Acute Wrist Injuries | Acute Wrist Pain Sudden onset injuries are called acute injuries and are usually caused by a fall onto the hand with an outstretched arm or a forced twisting movement. Damage can occur to the bones, ligaments (connect bone to bone) or tendons (connect muscle to bone) in the wrist. Acute Bone and Joint Injuries of the Hand and Wrist: A ... Acute Bone and Joint Injuries of the Hand and Wrist: A Clinical Guide to Management [Paul M. Weeks, Vicki Friedman, Louis A. Gilula, Paul R. Manske, R. Christie Wray, L.V. Young] on Amazon.com. *FREE* shipping on qualifying offers. Diagnosis and Treatment of Acute Lunotriquetral Ligament ... Isolated acute lunotriquetral (LT) injuries are an uncommon diagnosis in hand surgery. Diagnosis is aided by a high index of suspicion when pain is localized over the LT joint. Standard radiographs show typically normal findings, leading to advanced diagnostic investigations, including MRI and wrist arthroscopy. Standard treatment options for acute LT injuries include immobilization.
